

OVERVIEW ON STATUS OF IMPLEMENTATION OF ECO DESIGN DIRECTIVE 2009/125/EC

Last update: 12.03.2018

Working plan 2005-2008

Lot	Study phase	Draft Implementation			Final adoption	Content :
		Consultation Forum + Better Regulation consultation if applicable	Regulatory Committee	EP & Council right of scrutiny		
Lot 1: Boilers	VHK www.ecoboiler.org Final report 30.09.2007	24/25.06.2009 Boilers I Boilers II ISC Jan / Feb 2012 WTO notification June 2012	Vote on 13.03.2013	Spring 2013	Commission Regulation 813/2013 of 2 August 2013 on space heaters and combination heaters (O.J. L 239 - 06.09.2013) Transitional methods of measurement and calculation (2014/C 207/02) Commission Implementing Decision C(2015) 2626 of 27.4.2015 on a standardisation request COM guidelines (January)	<p>1. Space heaters and combination heaters, as defined in article 2, with a rated heat output ≤ 400 kW, including devices integrated in packages mentioned in art. 1.1. Art. 1.2 foresees 7 exclusions.</p> <p>2. 26.09.2013</p> <p>3. As of 26.09.2015:</p> <ul style="list-style-type: none"> • Heaters shall meet energy efficiency requirements set out in Annex II.1a • Combination heaters shall meet energy efficiency values set out in Annex II.2a • Heat pump space & combination heaters shall not exceed sound emission values set out in Annex II.3 • Product information requirements (including RE information) <p>As of 26.09.2017</p> <ul style="list-style-type: none"> • Electric space heaters, electric combination heaters, cogeneration space heaters, heat pump space heaters and heat pump combination heaters shall meet energy efficiency requirements set out in Annex II.1b • Combination heaters shall meet energy efficiency values set out in Annex II.2b <p>As of 26.09.2018</p> <ul style="list-style-type: none"> • Heaters shall not exceed nitrogen dioxide emissions values specified in Annex II.4 <p>Resource efficiency requirements</p> <ul style="list-style-type: none"> • Relevant product information for disassembly, recycling and /or disposal at end of life <p>4. The Regulation does not provide references to harmonised standards, but Annex III provides measurement and calculation provisions</p> <p>5. Annex IV includes some provisions on verification procedure, including limit values</p> <p>6. Annex V provides benchmarks for energy efficiency, sound emissions, and nitrogen oxides emissions</p> <p>7. No later than 26.09.2018, with a particular attention to emissions to refrigerants, air and noise emissions, biomass sourced heaters, conversion coefficient as well as the third party certification</p>
